We are glad to learn that arrangements are being made to supply our District with electricity from the Jog Electric Works. We pray that the benefits of the same may be extended to this Taluk also, as it will definitely give a great impetus to improvements in agriculture in the rural parts of this Taluk where there is extensive land available for the same.

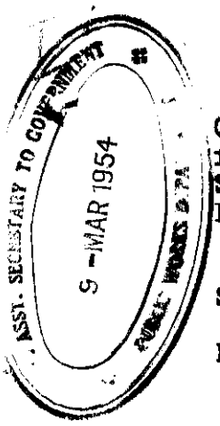
19473



Copy of letter No.2816-F/53-9, dated 1-3-1954 from the Chief Operation Engineer(South) to the Secretary to Government, Public Works Department, Fort St. George, Madras.

Sub:- Electricity--Pykara System--Extension of power to Kasargode, Kumbla and Manjeshwar firkas.
Ref:- My letter No.2816-F/53-8, dated 19.2.1954.

A detailed scheme for the supply of power to Kumbla and Kasargode estimated to cost about Rs eight lakhs in the first year rising to Rs Twelve lakhs was investigated in 1946-47 and sent to Government. In view of the poor return and high cost, the scheme was ultimately ordered to be dropped vide G.O.Ms.No.3201.P.W., dated 29.8.1949.

2. An agreement has recently been concluded with the Mysore Government for the supply of power to South Kanara District from Jog. The work of erecting the 110 K.V. line to Mangalore is already in progress and it is expected to be completed by the end of July 1955 even much earlier than the supply from Jog is made available. A comprehensive scheme for supply to these places including enroute places like Ullal, Manjeshwar, Mangalpadi, Kumbla, Kasargod and Pallikere will be evolved from Mangalore 110 K.V. sub-station and necessary proposal will be finalised sufficiently in advance of the materialisation of the 110 K.V. Sub-station at Mangalore.

3. With reference to Government Memo.No.10002-I/54-1, dated 18.2.1954, I have to state that no representation has been received recently for the extension of power to Kasargod area. In Memo.No.103436.E/53-1, dated 3.12.53 Government forwarded an extract of the Welcome address of the President and members of Kasargod Panchayat Board addressed to the Hon'ble Chief Minister, for necessary action.

PUBLIC WORKS DEPARTMENT

NOTE FOR SUPPLEMENTARIES.-VIDE STARRED QUESTION NO.25 by SRI N.SRINIVASA MOGRAL, M.L.

An agreement has been concluded on 21.8.1955 between this Government and the Government of Mysore for supply of power to the South Kanara District from Jog Falls in the Mysore State. The agreement provides for the commencement of supply by Mysore within a period of 45 months from the date of the Agreement, the quantum of power to be supplied being 2,800 K.W. at the commencement of supply, rising to 3,500 K.W. at the end of two years and ultimately to 6,000 K.W. at the end of six years from the date of commencement of supply. The supply from Mysore is proposed to be tapped by the Government Electricity Department at Hulikal for distribution in the South Kanara District. After having completed the necessary preliminary investigations survey etc., the Electricity Department of this Government is having on hand the construction of the main transmission lines and sub-stations on the Madras side in the South Kanara District for availing and distributing the supply from Mysore and the work is expected to be completed by the end of July 1955. In the Budget Estimate for 1954-55, a provision of about Rs.21 lakhs has been made for this purpose. As regards construction of the transmission line etc. on the Mysore side for making supply available to this Government at Hulikal, the Chief Electrical Engineer, Mysore, has stated that it has been proposed to run a 110 K.V. line from Shimoga to Hulikal (for a distance of about 52 miles) and that the necessary estimate for the work is pending sanction of the Government of Mysore. At the

P.t.o.

stance of our Chief Engineer (Electricity), it ~~is proposed separately to address~~ the Mysore Government have been separately addressed to arrange for the commencement of work on the necessary transmission lines etc. on their side immediately, so that it might be possible for the Government to avail the supply by the time the works on the Madras side have been completed. It will be seen from the above position that the preliminary investigation in respect of the works on the Madras side relating to the Supply of Jog power to South Kanara have already been completed and that the works are under execution.

Clause (c) of the L.A. Question:- Representations were received in the matter in September and November 1953 from the Member who has given notice of the present L.A. Question and they are under consideration. The Chief Engineer has reported in this connection that the scheme for extension of supply of electricity to Kasaragode Taluk will be feasible only after materialisation of the 110 K.V. sub-station at Mangalore and the availability of Jog power through the 110 K.V. transmission line to Mangalore which is at present under construction. The need for extension of supply of power to Kasaragode was referred to by the Kasaragode Panchay Board also in its welcome address to the Chief Minister in November 1953 and this was forwarded to Chief Operation Engineer (South) for disposal.

(From the C.E.(E) No.2816-E/53-9, dated 1.3.1954).

The file relates to the L.A.Question by Sri S.Megral, M.L.A., regarding extension of Jog Power from the Mysore State to the South Kanara District. An advance copy of the L.A.Question has already been circulated to M.(W) for information. As the question is starred, supplementaries may be expected. Particulars for answering the L.A.Question have since been obtained from the C.O.E.(S). The position in respect of the three clauses of the L.A. Question is set out below:--

2. Clause(a) of the L.A.question:- Whether the preliminary investigation for the supply of electricity from the Jog project to the South Kanara District has been completed:-

An agreement has been concluded on 21.8.53 between this Government and the Government of Mysore for supply of power to the South Kanara District

+ copy at (Y) in L F I
C no 111753/53

from the Jog Falls in the Mysore State. The agreement provides for the commencment of supply by Mysore within a period of 45 months from the date of the Agreement, the quantum of power to be supplied being 2,800 K.W. at the commencment of supply, rising to 3,500 K.W. at the end of two years and ultimately to 6,000 K.W. at the end of six years from the date of commencement of supply. The supply from Mysore is proposed to be tapped by the Govt. Electricity Department at Hulikal for distribution in the South Kanara District. After having completed the necessary preliminary investigations survey etc., the Elecy.Deptt. of this Government is having on land the main transmission lines and the construction of sub-stations on the Madras side in the South Kanara Dist. for availing and distributing the supply from Mysore and the work is expected to be completed by the end of July 1955. In the B.E. for 1954-55, a provision of about Rs 21 lakhs has been made for this purpose. As regards construction of the transmission line etc. on the Mysore side for making supply available to this Government at Hulikal, the Chief Electrical Engineer, Mysore, has stated that it has been proposed to run a 110 K.V. line from Shimoga to Hulikal (for a distance of about 52 miles) and that the necessary estimate for the work is pending sanction of the Government of Mysore. At the instance of our C.E.(E), it is proposed separately to address the Mysore Government to arrange for the commencement of work on the necessary transmission lines etc. on their side immediately, so that it might be possible for the Govt to avail the supply by the time the works the Madras side have been completed. It will be seen from the above position that the preliminary investigation in respect of the works on the Madras side relating to the Supply of Jog power to South

P.T.

C.M. 1002 I/54

Kanara have already been completed and that the works are under execution.

3. Clause (b) of the L.A.Question:- If not, why?:- In view of the position stated in para 2 above, this question does not arise.

4. Clause (c) of the L.A.Question:- Representations were received in Sept and Nov. 1953 on the matter from the Hon. Member who has given notice of the present L.A.Qn ~~in September and November 1953~~ and they are under consideration--see L.F.IV(C.No.83119-E/53). The C.E. has reported in this connection that the scheme for extension of supply of electricity to Kasaragode Taluk ~~can be considered~~ will be feasible only after materialisation of the 110 K.V. sub-station at Mangalore and the availability of Jog power through the 110 K.V. transmission line to Mangalore which is at present under construction. The need for extension of supply of power to Kasaragode was referred to by the Kasaragode Panchayat Board also in its welcome address to the Chief Minister in November 1953 and this was forwarded to the C.O.E. (South) for disposal.

5. Based on the position stated in paras 2 to 4 above, a draft answer is submitted. A copy of paras 2-4 above which may serve as a note for the supplementaries which may arise, may be sent to M.(W). The file may be circulated to M.(W) for approval of the draft answer below.

Supply of electricity to the rural parts of Kasaragode taluk.

* 356[a] Q.—SRI Y. MANJAYA SHETTY (on behalf of Sri M. S. Mogral) : Will the Hon. the Minister for Public Works be pleased to state—

(*a*) whether the preliminary investigation for the supply of electricity from the Jog Project to the South Kanara district has been completed;

(*b*) if not, why; and

(*c*) whether the Government have received any representation from the public of Kasargode in regard to the supply of electricity to the rural parts of Kasaragode taluk for agricultural, domestic and industrial purposes?

THE HON. RAJA SRI SHANMUGA RAJESWARA SETHUPATHI :—" (*a*) The preliminary investigations in so far as they relate to the work to be done on the Madras side have

been completed and the construction of the necessary transmission lines, sub-stations, etc., by this Government is in progress.

"(b) Does not arise.

"(c) Representations have been received from the hon. Member himself and the Panchayat Board, Kasaragode. Supply to the area will be feasible only after Jog power becomes available."

SRI K. VENKATARAMANA GOWDA :—"Sir, may I know whether the possibilities of load development at Puttur and its neighbourhood have been investigated and while there is a proposal to supply electricity to Kasaragode from Mangalore when Mangalore receives supply from Jog, is it not also feasible to supply Puttur by a line from there, as Puttur is nearer to Mangalore than Kasaragode?"

THE HON. RAJA SRI SHANMUGA RAJESWARA SETHUPATHI :—"Of course, that is yet another question. As the hon. Member says, it is nearer than the place to which power is taken, it can be considered."

MR. SPEAKER :—"I think we can take up questions Nos. 360 and 361 together."

Please see the printed proceedings on pp 4 to 5 above. No further action seems called for in this file. The papers may be recorded in a G.O. [As regards M above, necessary extracts will be taken for separate action
